

ITP

INTEGRATED TECHNOLOGY

PARTNERS

Integrated Technology Partners is a wholly-owned division of WTC Communications, Inc., a company with over 116 years of experience in the communications and information technology business. ITP's team of experienced IT, security, phone system, and structured cabling experts have the experience, expertise and resources to effectively install and manage complete IT, security, communication, and cabling systems of any size and complexity. Headquartered in Wilton, Iowa, we provide computer and networking, security, and phone system services to over 1,000 companies across Eastern Iowa and Western Illinois.

CHALLENGE

Conceptual Design was experiencing costly downtime that lead to unproductive employees. They had an unreliable backup along with security vulnerabilities. IT costs were unpredictable including surprise and overage bills.

SOLUTION

Integrated Technology Partners partnered with Conceptual Design and created a comprehensive technology plan that matched their business goals including a true unified threat management, hybrid/cloud back-up and disaster recovery and solid agreements to eliminate surprise billings and overages.

RESULTS

Conceptual Design experienced a faster network. This has enabled them to be more productive with no frustrations. They are protected with a secure antivirus product on all devices and a unified Threat Appliance with managed security updates. They are backed up on a local, that is also replicated to the cloud, doubling as a recovery in case of hardware outages. Their IT bills are consistent with contracts & fewer unpredictable cost.
